

DOUBLE FLOAT® MASTER Pump Switch

Mechanically activated switch designed to control pumps up to 15 FLA, 90 LRA, 120 VAC or 240 VAC.

This mechanically activated, pump switch provides automatic control of pumps in non-potable water and sewage applications. It is well-suited for confined applications requiring an accurate pumping range. It is not sensitive to rotation or turbulence. This switch is voltage sensitive - use with correct voltage.

The **Double Float® Master** pump switch consists of two mechanical floats and a splice tube. The splice tube contains a holding relay which enables the floats to function in series.

The holding relay eliminates pump chatter in turbulent conditions allowing the **Double Float® Master** pump switch to operate relay control panels for larger pump applications.

FEATURES

- Controls pumps up to 15 FLA, 90 LRA, 120 VAC or 240 VAC.
- Adjustable pumping range of 3 to 48 inches (7.6 to 122 cm) with increased pumping range up to 6 feet (1.8 meters) available.
- Includes standard mounting clamps and boxed packaging.
- CSA Certified.
- Five-year limited warranty.
